4. FIRST AID MEASURES

**Swallowing**
Do not induce vomiting. Obtain medical attention immediately.

**Inhalation**
Remove to fresh air. Obtain medical attention if symptoms develop.

**Skin contact**
Immediately wash with soap and water for at least 15 minutes. Immediately remove contaminated clothing and shoes. If redness or irritation occurs, seek medical attention.

**Eye contact**
Immediately flush eyes with water and continue washing for at least 15 minutes. Remove contact lenses, if worn. Obtain medical attention if irritation develops.

5. FIRE-FIGHTING MEASURES

**NFPA CLASSIFICATION**
- Health: 2
- Flammability: 1
- Reactivity: 1

**Hazardous combustion products**
- Carbon dioxide.
- Carbon monoxide.
- Oxides of phosphorous.
- Phosphine.

**Special fire fighting procedures**
Water spray may be used to cool containers and adjacent surfaces. Run-off water may be highly acidic and should be collected and neutralized if possible.

**Special protective equipment for firefighters**
Firefighters must be equipped to prevent breathing of vapors or products of combustion. Wear an approved self-contained breathing apparatus and protective clothing.

Full protective clothing

**Extinguishing media**
- CO2
- dry chemical
- foam

**Unusual fire and explosion hazards**
Hazardous combustion products may include intense heat, dense black smoke, carbon monoxide, carbon dioxide, hydrocarbon fragments, phosphine, fragments of phosphate/phosphate esters and oxides of phosphorus.

6. ACCIDENTAL RELEASE MEASURES

**Personal precautions**
Wear protective clothing when taking up spill. Avoid contact with eyes and skin.

**Environmental precautions**
Avoid drainage to sewers or natural waters. Since phosphites can hydrolyze, notification of governing agencies may be appropriate due to the possible release of phenolic materials.

**Methods for cleaning up**
Avoid contact with liquid and vapors. Dike area of spill to prevent spreading and pump liquid to salvage tank.
Absorb residue with inert absorbent, and transfer to proper containers. Remaining material may be emulsified with soap and water and absorbed on additional sorbent. Do not flush to sewer. Since phosphites can hydrolyze, notification of RCRA may be appropriate due to the possible release of phenolic materials. Do not flush this product to sewers or waterways.

### 7. HANDLING AND STORAGE

#### HANDLING

**Handling precautions**
- Avoid contact with eyes, skin and clothing.
- Wash thoroughly with soap and water after handling.
- Do not eat, drink or smoke when handling.
- Keep containers tightly closed to prevent contamination.
- Electrically bond and ground all containers and equipment before transfer or use of material.

**Other precautions**
- Caution - If water contamination has occurred, or if you have any reason to suspect water contamination, do not heat containers of product. Do not heat opened containers with steam in a manner which will allow steam to condense into the container.

#### STORAGE

**Storage requirements**
- Keep away from heat, sparks and flame.
- Store in a dry place away from excessive heat.
- Exposure to moisture or high humidity can cause hydrolysis producing phosphorus acid and phenol.
- Keep container tightly closed.
- Normal precautions common to safe manufacturing practice should be followed in handling and storage.

### 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

#### PERSONAL PROTECTION

**Respiratory protection**
- None required in normal use.
- NIOSH approved full face organic respiratory protection required in the absence of proper environmental control. For emergencies, a self-contained breathing apparatus and full chemical resistant suit.

**Hand protection / protective gloves**
- Gauntlet type gloves of nitrile rubber or butyl rubber recommended; for short time contact PVC is suitable.

**Eye protection**
- Safety glasses with side shields.
- Safety goggles.

**Skin protection**
- Chemical resistant protective clothing.

**Industrial hygiene measures**
- Do not eat or drink at work.
- Remove contaminated clothing and clean it.

#### ENGINEERING CONTROLS

**Ventilation**
- Use local ventilation or engineering controls as needed to maintain personnel exposure below the exposure limits.

**Further information**
- Provide for sufficient ventilation and/or exhaust.
